EXCEL 88 CONCENTRATE

The most exciting multi-purpose cleaning product formulated this century, to reduce your cleaning cost in your factory, home and auto. One concentrate, mixed to the job. Efficient cleaning with no harsh chemical or toxic fumes.

SINCE 1973

Over 40 years in business, servicing more than 50 countries worldwide. From the hotels of Barbados to steel manufacturers in Venezuela. A business built on honesty and total commitment to customer satisfaction.

ENVIRONMENTALLY SAFE

NON-TOXIC · BIODEGRADABLE · NON-FLAMMABLE

ENVIRONMENTALLY SAFE · NON-TOXIC · BIODEGRADABLE · NON-FLAMMABLE

GENERAL DIRECTIONS

GENERAL CLEANING 1 : 30

Excel 88 is used as a general all-purpose cleaner. Using 1 part Excel 88 to 30 parts water, with a sprayer apply to counter tops, office and home furniture, painted walls, auto upholstery, light fixtures, all appliances, etc. Then wipe dry with a clean cloth or towel. Use 5 : 1 for tough problems such as rust, road tar, driveway cleaning and soap build-up. Do not use in hot sun or while a surface is hot. Let it cool down.

LAUNDRY 1 : 10

A pre-wash in your laundry (avoid satin, silk and soft leather products), removing virtually every stain. The results are astonishing! Whether grease, oil, blood, inks or makeup, Excel 88 will greatly reduce your laundry room or facility expenses.

CARPETS 1 : 30

Always test for colourfastness on carpet, upholstery and fabrics. Removes grease, wine, liquor, pet stains, gum, oil, coffee, glue, paint, grape juice, candle wax, some inks, vomit, water stains and hair dye. Vacuum well before shampooing; with a shampoo machine use 1 part Excel 88 to 30 parts water and follow the instructions on the machine.

SPOT REMOVAL 1 : 10

Apply to the stain with a spray bottle. Brush in if needed, then wipe dry with a cloth. A hair dryer or fan completes drying.

JEWELRY (DIAMOND, GOLD, SILVER) 1 : 10

Dilute 1 to 10 in a bowl or jar. Immerse jewelry for five minutes, scrub with an old toothbrush, rinse and buff dry with a cotton cloth. The new shine and sparkle will amaze you.

AROUND THE HOUSE

CHEWING GUM, CANDLE WAX, HAND GLUE

Spray

Take a sharp object such as an exacto knife and cut holes into the object. Lift the edges so Excel 88 gets underneath. Spray on the holes and around the edges, let stand two minutes to emulsify, then remove.

FLOORING 1 : 30

On linoleum, tile, porcelain, ceramic and/or cement, mix in your mop bucket. Apply to the floor for 2 to 3 minutes, then mop dry. Rinsing is not needed.

HEAVY WAX BUILD-UP 1 : 10

Let set for 5 to 10 minutes, then mop dry with a damp mop.

WINDOWS 2 caps : 1 quart

Dilute 2 caps full of Excel 88 into a quart of water. Spray on and wipe dry with newspaper, cotton cloth or paper towel. Leaves surfaces streak free.

ALUMINUM, STAINLESS STEEL, CHROME 1 : 20

Spray on, then buff dry with a cloth or power buffer for best results. Will leave a streak-free surface.

RUST REMOVAL 1 : 5

Spray on, let set for 5 minutes, then wipe clean. A scotch pad may be used if desired.

HELPFUL HINT

After cleaning vinyl or wood with Excel 88, use a natural lemon oil or petroleum jelly to bring back the natural shine.

SHOP, AUTO AND KITCHEN

BODY SHOP USES 1 : 10

Removes urethane off glass, hands, upholstery and carpets without smearing. Spray on, let set 5 minutes, wipe with a clean cloth. For overspray and silicon on head and tail lights, tires, glass and auto interiors: 5 to 10 minutes, then wipe with a dry cloth. As a metal prep, primer wash and anti-static, prevents fish eyes.

DEGREASING BOATS, MOTORCYCLES, ENGINES, PARTS 1 : 5

Apply with a spray bottle onto a warm motor and leave 10 minutes. If the motor is cold, leave 20 minutes or so, then wash off with a pressure washer or garden hose. Heavily greased parts: submerge for 20 to 30 minutes, then rinse.

RESTAURANT EXHAUST VENTS AND GRILLS 1 : 5

Mix in a dip tank. Submerge the extractor vents for about one hour, remove and rinse with clean water. For back drops and grills, spray on a warm (not hot) surface, wait 5 to 10 minutes, then rinse or wipe with a clean dry cloth.

CONCRETE DRIVEWAYS 1 : 10

Do not use on asphalt. Spray onto the area, use a strong bristle brush and allow five to ten minutes for the soil to break up. Hose off with water.
